Sõna kaasa teelisele ...

Eestikeelne filatelistlik kirjavara ei ole väga rikkalik. Sellel on nii ajaloost kui ka oludest tingitud põhjusi.

Olles tutvunud lugeja laual asuva kataloog/käsiraamatu käsikirjaga tõdesin, et tehtud on suurepärane süvitsi minev uurimus, mis jätkab seniseid Eesti filateelia traditsioone. Siinjuures käsitletav materjal kajastab taasiseseisvunud Eestis ilmunud postmarke. Samuti on teoses süstematiseeritud paljude filateliste töö, mis varem on ilmunud kas tänapäevases interneti väljaannetes või paberikandjail ja lisatud on ka rohkelt seni avaldamata materjale.

Kokkuvõetult on lugeja laual käsiraamat, mis näitab, et Eesti filateelia ja postiajaloo uurijate kogukond elab, on toimiv ja teovõimeline.

Soovin edu sellele tööle ja ka edaspidiseis ettevõtmistes.

Rootsimaal, Göteborgis 2014-09-02

Elmar Ojaste, tuntud ka kui Wanna Matz

To the English user

Although Estonian stamp errors and varieties have been covered on a smaller scale in “The Catalogue of Estonian Postage Stamps and Postal Stationary” by Estonian Heritage Society/Mart Aru (it’s 10th edition was published in 2012), more dedicated collectors of everything irregular have felt the need for a handbook-like publication, which would not only include all known stamp errors and varieties, but would also enlarge collectors perspective by discussing essays, proofs, sheets etc. This is exactly what we are intending to do with our publication.

In the build-up of our catalogue we have followed “The Philately & Postal History Handbook-Catalogue of Estonia” by Vambola Hurt and Elmar Ojaste, which was published in 1986 in Sweden, by adopting for example it’s classification of varieties.

Our catalogue consists of two parts: first, the main section of postage stamp errors and varieties, and after that all additional material – stamp sheet varieties, proofs and essays etc.

Every stamp has it’s individual information table, containing data important for the collector. It looks like this:

1	2	
3	4	5
	6	7
	8	9
	10	11

Here’s the explanation in English.

1. The number of the stamp issue, assigned to it by Eesti Post.
2. The name of the stamp issue and it’s nominal price.
3. The picture of the stamp.
4. The colour of the stamp (most stamps are *mitmevärviline* = multicoloured).
5. The date of the issue.
6. Perforation.
7. Printing method, sheet size.
8. It’s quantity. If there is something subtracted from the initial amount, it means that these stamps were destroyed by Eesti Post.
9. The artist of the stamp.
10. Paper fluorescence (*sinine* – blue, *kollane* – yellow).

11. Printer.

If there are letters F, G or H in the first cell of the table, these mean the following – F: this issue is also been discussed in the sheet section, G: this issue has additional information in the section of proofs and essays, and H: there are more errors or varieties in the section of Supplements (*Täiendused*, p. 247). If in the seventh cell there are some numbers in parentheses, like f. ex. 4 x (4x5), it means that the first number shows how many post office panes there are in the printer's sheet – in this case 4 post office panes, each of which is made of 4 stamps in each horizontal row and 5 stamps in each vertical row.

As already said, we are using the classification of varieties by Hurt/Ojaste, where the following letters stand for the following types of varieties:

A – varieties of perforation,

B – colour varieties,

C – paper varieties,

D – gum varieties,

E – varieties and errors that are related to the printing process. Type E is the most prevalent.

When setting prices, we have been directed by the actual price information on the market. But it may still happen that some prices may seem too high or too low for some. Our pricing tries to offer general guidelines from which deviations may occur. As a rule we proceed from the market prices of mint stamps and the prices of used stamps have by default been set according to these. But there are stamp issues where used stamps are more rare and expensive and this, of course, reflects also in the prices. If instead of prices there are just dashes, it means, that either the stamp is so rare, that it is very hard to set a price to it or it has not been found in every form (f. ex. used copies of stamps that have been printed on the glue side or mint varieties of stamps only found on envelopes). Sometimes there is a remark on the description line, stating either *ümb* or *ümbrikul* and then the price – meaning, that it is the price for such a stamp on an envelope.

Many collect stamps in blocks of four, but as it appeared to be too complicated to value such items, we decided not to set prices on blocks of four and corner blocks of four. If the variety appears only on one stamp of the block of four, the price goes only slightly up, but in the case where all four stamps are varieties, the price is remarkably higher if compared to the same four single stamps. And the price of corner blocks of four are in this case even higher.

If known, we are on the description line giving the position number of the stamp on the sheet, in order to make finding it easier. We hope to be able to make all these description lines available in English (and maybe even other languages) on our website, although a picture tells sometimes more than a thousand words. As to the scans, they differ much in quality and sometimes

we were even forced to use black and white pictures from other publications. Do not take our scans as proofs of different colours or colour shades of certain stamps, as sometimes there can be 3–4 different shades to the same stamp, dependent on various scanners (see f. ex. the stamp 062-02-1994). But in cases where under the letter B we clearly point to a colour variety, there really exist stamps with different colours and/or colour shades.

We have certainly not registered every tiny dot and dash (or something similarly marginal), although we do register lots of dots and dashes. Our aim is rather to give orientations within the realm of stamp errors and varieties and if you happen to discover a stamp which has a dot somewhere in the picture which we do not register, then let's just take it as a variation to the existing ones and let's price it according to similar issues. We still believe that we have managed to chart more or less all known errors and varieties and if you do not find your error in the main section, take a look to the one called *Täiendused* (Supplements) and you may find it there. But collectors are to find for sure new and unknown stamp errors and we hope that our catalogue gives a boost to the collection and study of stamp varieties.

A few comments on the second part of our catalogue. First it covers stamp sheets and stamp booklets and their errors and varieties (p. 253). After that a large section is dedicated to stamp proofs and essays (from p. 283), which has been divided into three by the main artists whose stamp proofs and essays are collectible – Vello Kallas (a huge selection), Lembit Lõhmus (who has also designed the cover of this book) and Henno Arrak. On pages 332–337 we have some errors of the Tartu Post Office perfostamps and after that some peculiar issues, like the official Christmas cards of Eesti Post, which have existing stamps on them, but printed with different colours etc. On page 344 we have some samples of fluorescence errors, after that a table for the collectors of colour stripes that were printed to sheet margins and another table for gum varieties. Here you can also see what numbers do contemporary Estonian stamps have in the Michel catalogue.

To the collectors of stamp errors we recommend Estonia's biggest Internet philatelic shop AA Gallery, which can be found at the address www.aagal-lery.eu.

All users are more than welcome to send their comments, corrections and complements to the editors of this catalogue, using the e-mail address info@erim.ee. Our web-address is www.erim.ee, where we hope to give more useful information to our international users.

If there is only one figure at the end of the description line, it means that both mint and used stamps have the same price. If there are two, the first one shows the price of mint stamps and the second of used stamps.

003

- A1 Shifted horizontal and vertical perforation 5.-
- B1 Lighter and darker blazon 3.-
- E1 Defective blazon frame and a worn lion (pos 47) 15.- 20.-
- E2 Break in the blazon frame (pos 83)(on the envelope €200) 65.-
- E3 Broken lion's tail (pos 87)(on the envelope €200) 65.-
- E4 Blazon frame broken in several places (pos 37) 7.-
- E5 Dark spot in lion's belly (pos 85) 7.-
- E6 Break in the net 5.-
- E7 O with a white dot (pos 31) 3.-
- E8 Worn lion (pos 51) 15.-

E9 Dot in the shade (pos 3) 5.-
E10 Defective 0 (pos 18) 8.-
E11 Defective blazon frame and shifted perforation (pos 88) 5.-
E12 Defective tail (pos 19) 5.-
E13 Ink smear around letter E (pos 79) 5.-
E14 Various ink smears 10.-
E15 Blue dot (pos 10) 2.-
E16 Defective blazon frame (pos 27) 2.-
E17 Hole in the net (pos 86) 9.-
E18 Broken blazon frame (pos 24) 6.50
E19 Notch in the blazon frame (pos 14) 3.-
E20 Red dot in the nominal 5.-
E21 Blue dot inside the blazon (pos 85) 7.50
E22 Blurred print (pos 65) 5.-
E23 Lion's mouth and back broken (pos 71) 10.-
E24 Broken blazon frame and nominal (pos 81) 6.-

p. 16

004

A1 Shifted vertical perforation (on the envelope €320) ---
A2 Shifted horizontal perforation 5.-
A3 Shifted horizontal perforation 10.-
E1 Colour dot in the net 5.-
E2 Black dot in the right corner (pos 76) 3.-
E3 Defective 1 (pos 47) 5.-
E4 Dot in lion's tail (pos 71) 2.-
E5 Dots in different places (pos 84) 2.-
E6 S with a tail (pos 59) 10.-

p. 17

005

A1 Shifted horizontal perforation (on the envelope €15) --- 15.-
E1 Light spot on the net, plus a yellow dot (pos 76) 25.-
E2 Colour dot by the letter S (pos 59) 3.-
E3 Broken net (pos 68) 10.-
E4 Colour dot in the net (pos 13) 2.-
E5 Dark line (pos 72) 10.-
E6 Brown „thorn“ (pos 25) 3.-
E7 Yellow dots (pos 91) 2.-

p. 18

006

E1 Dot below the net (pos 12) 3.-
E2 Dot in the lower right corner (pos 19) 3.-
E3 Dot in the lower left (pos 24) 3.-
E4 Broken net (pos 100) 5.-
E5 Defective blazon frame (pos 43) 5.-
E6 Upper lion's belly defective 3.-

p. 19

007

E1 Defective shading (pos 4) 7.-

E2 Something resembling the letter h (pos 88) 5.-
E3 Colour dot in the upper right corner (pos 76) 3.-

p. 20

008

A1 Shifted horizontal perforation, up 10.-
A2 Shifted horizontal perforation, down 10.-
B1 Darker blue of the flag 5.-
B2 Dark background 10.-
E1 White dot inside the letter D (pos 33) 15.-
E2 White line between T and I (pos 44) 15.-
E3 Black spot on the top of S (pos 33) 15.-
E4 Black dot on the letter E (pos 23) 10.-
E5 Black dot on the frame (pos 32, 34, 36, 38, 40) 3.-
E6 Two defective letters E (pos 4) 10.-
E7 White dot on the background (pos 27) 15.-
E8 Black dot on the letter E (pos 23) 10.-
E9 Broken frame 3.-
E10 Blue dot inside the letter A + another dot (pos 10) 15.-
E11 Black dot on top of the number indicating the year 4.-
E12 White dot on black 5.-
E13 Big black dot on the letter N 10.-
E14 White dot on the letter N (pos 42) 10.-
E15 Dark dot on the blue of the flag (pos 1) 5.-
E16 Light circle on the black of the flag (pos 9) 5.-
E17 Light circle on the black of the flag 5.-
E18 Two light circles on the black of the flag 7.-

p. 22

009

B1 Darker green as usual 5.-
E1 Two gray circles above the letter S (pos 48) 15.-
E2 White circle below the Vörtsjärve lake (pos 25) 25.-
E3 Long white line (pos 3) 10.-
E4 Hazy 2 and the letter I with a dot (pos 11) 10.-
E5 Gray spot (pos 31) 15.-
E6 Spot on lion's face and broken back (pos 24) 35.-
E7 Defective E (pos 10) 10.-
E8 Black dot (pos 19) 10.-
E9 Hazy A (pos 15) 10.-
E10 White circle by the city of Türi (pos 46) 15.-
E11 White circle right to the Vörtsjärve lake 15.-
E12 Something resembling the letter P above Central Europe (pos 38) 10.-
E13 Black dot on the top of the Vörtsjärve lake (pos 47) 7.-
E14 White circle by the city of Põltsamaa (pos 46) 15.-

p. 24

010

E1 Arabic number 1 (pos 147) 20.-
E2 Green dot (pos 158) 7.-
E3 Greek L (pos 71) 25.-
E4 Green hair (pos 165) 10.-

- E5 Black dot (pos 174) 15.-
- E6 1 mm wider stamp than the regular (entire roll) 3.-

Every 10th stamp in the roll of all the coil stamps has a serial number on the gum side.

011

- E1 Black dot in the net (pos 33) 7.-
- E2 Defective frame (pos 171) 7.-
- E3 Long blue line (pos 113, 161) 10.-
- E4 Black dot in the net (pos 47) 7.-
- E5 Dots + line on the letters E S O (pos 189) 7.-
- E6 Red line (pos 109) 5.-

p. 25

An example of the serial number on the gum side. The whole print-run of stamp 011 has also the so-called „double impression, one albino“, which means that the stamp is overprinted twice. The second overprint is not inked, just leaves the impression in the paper (seen best on the gum side). There can also exist stamps with shifted second overprint, so that perforation parts the blazon f.ex.

A forgery of 010

E5 Dot below the letter X 5.-
E6 Bluish-green colour in the underlying net --- 350.-

p. 35

027

E1 Ink smear below the letter E 10.-

Varieties of stamp booklets 01 (stamp 028) and 02 (stamp 029) are being described in the II part of the catalogue (p. 260, 264).

028

E1 Long brown line (Booklet nr. 2, II type) 15.-
E2 Brown line (Booklet nr. 2, II type) 10.-
E3 Brown colour missing from duck's wing (Booklet nr. 2, II type) 25.-
E4 Defective artist's name (Booklet nr. 2, II type) 25.-
E5 Double brown line (Booklet nr. 2, II type) 20.-
E6 Black colour in feathers 2.-
E6a Worn-out feathers 10.-
E7 Light spot (Booklet nr. 2, II type) 2.-
E8 Defective cheek 5.-

p. 36

Stamp varieties in booklets

Some possible variants of the letter R and the digit 1
The head and the wing of the bird on the left is darker
Different variants of brown on the wing
Light spot on the top of the feather

p. 37

029

E1 Pink dots 5.-
E2 Defective letter D 5.-

030

A1 Shifted horizontal perforation 5.-
A2 Shifted horizontal perforation 1,2 mm 15.-
A3 Shifted horizontal perforation 2 mm 20.-
A4 Shifted vertical perforation 2.-
B1 Lighter and darker stamp 5.-
B2 Darker green and red 5.-

C1 Yellow fluorescence, glossy gum, print-run 44 950 5.- 2.50
D1 Stamp printed on gum side ---
E1 White circle in the frame (pos 10) 10.-
E2 Green line and dot (pos 21) 1.50
E3 Black line (pos 20) 10.-
E4 White circle below 0 20.-
E5 White semicircle (pos 26) 5.-
E6 Christmas tree and decorations have white dots 5.-
E7 White dot in the frame (pos 29) 5.-
E8 Various dots on the stamp (pos 38, 45, 31) 5.-
E9 Colour shift 10.-
E10 Defective Christmas tree 10.-
E11 Broken frame 5.-
E12 Defective 0 (pos 1, 11, 21, 31, 41) 4.-
E13 Green dash 4.-
E14 Defective 0 (pos 1 ja 41, on C1) 7.-
E15 White dot on the letter T (pos 9) 2.-
E16 White spot on the letter T (pos 10) 5.-
E17 White dash on the decoration (pos 19) 2.-
E18 White dash by the figure 3 (pos 20) 2.-
E19 White V on the decoration (pos 21, from "Elva Filatelistist") 7.-

p. 40

E6 Flecked sail (pos 7) 10.-
E7 Flecked sail (pos 7) 5.-
E8 Flecked sail (pos 7) 7.-
There are more variants of the flecked sail.

p. 231

465

E1 Coloured dash 3.-

p. 232

468

E1 White line (pos 18) 10.-

470

B1 Partially different colour 10.-

The post horn stamps have lots of casual defects connected to the printing process, like tiny dashes, dots, circles etc., which we do not record, as there are

so many of these and they are mostly casual errors.

p. 233

477

E1 Big light spot (pos 19) 15.-

478

E1 Blue dot (pos 18) 5.-

484

Main varieties: stamp on the left has an iron rod on the right edge of the platform, which the stamp on the right does not have; the line going from top to bottom is at times consistent and at times broken; there are differences on the entrance.
